

IZUMI MINI CHILLERS LINE UP

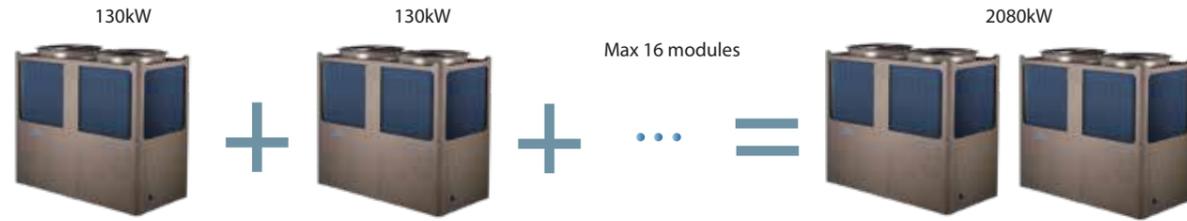

Izumi Air Cooled Chiller

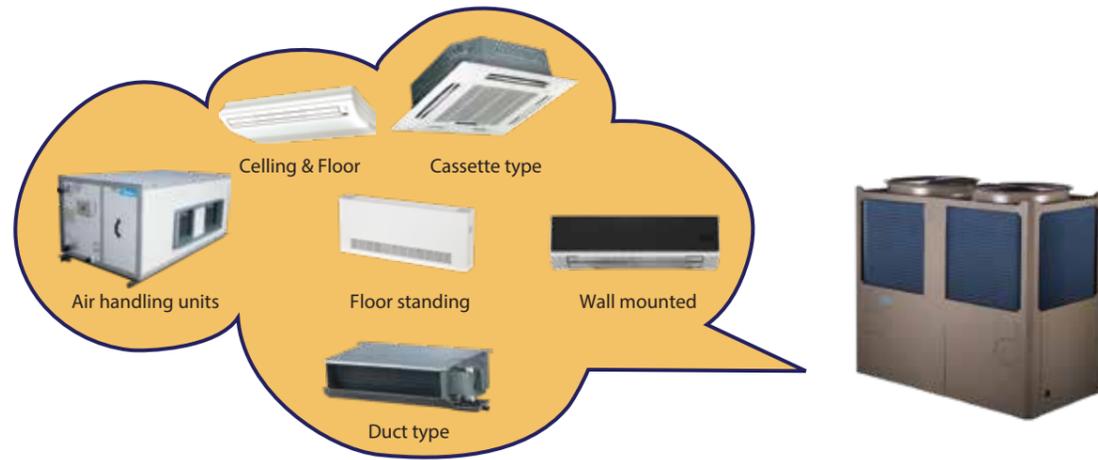

Features

Wide application range >>

Aqua Tempo Super chillers with cooling capacity ranging from 35kW to 130kW, combination model's maximum capacity ups to 2080kW.

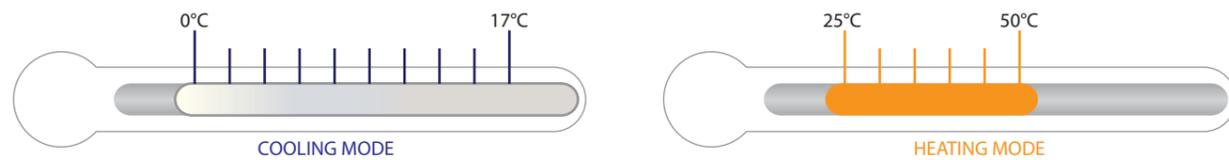

❖ Freely combine with fan coil units and air handling units. Home owners may choose the best types according to their functional needs.

❖ Wide ambient temperature operating range

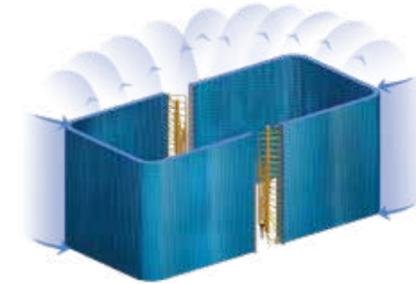

❖ Wide outlet water temperature range

Advanced technology >>

❖ H shape high performance heat exchanger

The chillers use new structure design, H shape condenser, 360° air intake, increase the heat exchanging area, efficiently enhance the heat exchange efficiency, and decrease the covering area.

Newly designed air profile
Big air flow lower noise

360° Condenser coil
High efficiency

Removable panel
Easy to maintain

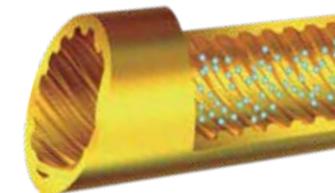

Transportation hole
Easy to install

Multi folder frame
Nice and strong

H shape condenser uses inner grooved copper tube and hydrophilic aluminum foil, greatly improve the heat exchange efficiency.

Izumi Air Cooled Chiller

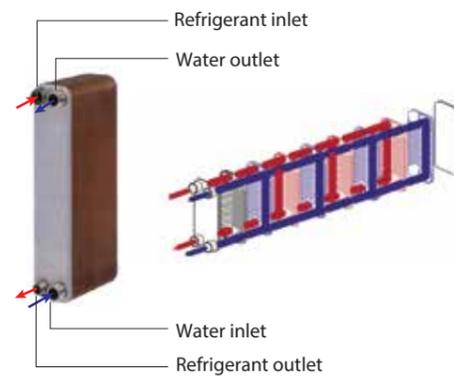

❖ EXV for more precisely flow control

Patented liquid distribution components to maximize performance and minimize defrost impact.
500 steps EXV plus capillary for stable and accurate gas flow control.
Fast respond resulting in higher efficiency and improved reliability.

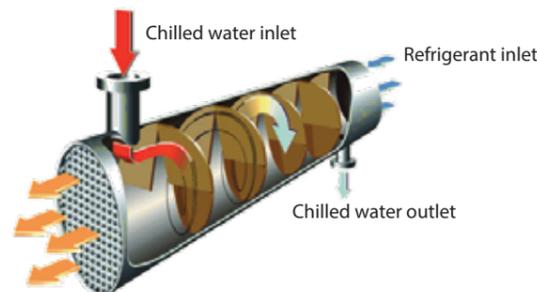

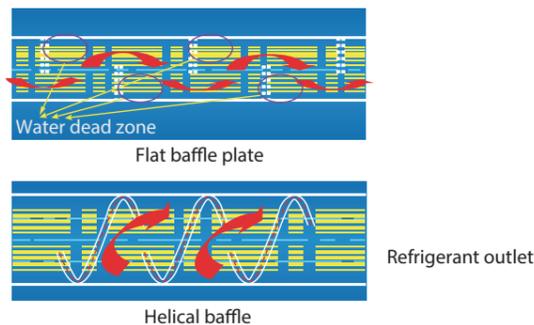

❖ High efficiency plate heat exchanger (For SP-HMLA series)

Plate heat exchanger uses metal plates to transfer heat between refrigerant and water. The fluids are exposed to a much larger surface area because the fluids spread out over the plates, so both heat transfer efficiency and heat exchanger speed are greatly improved.
Multi protections including voltage protection, current protection, anti-freezing protection and water flow protection ensure system

❖ Tube-in-tube & shell-tube heat exchanger (For SS-LA series)

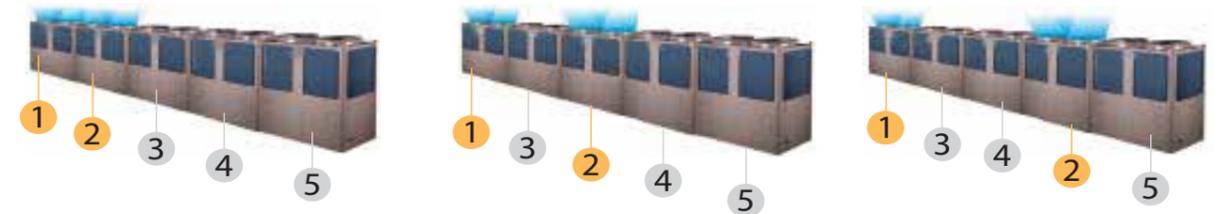

For shell-tube heat exchanger, the module adopts the new helical baffle design to avoid the rectangular place of water dead zone, greatly improve the heat exchange efficiency.

High reliability >>

Alternative cycle duty operation

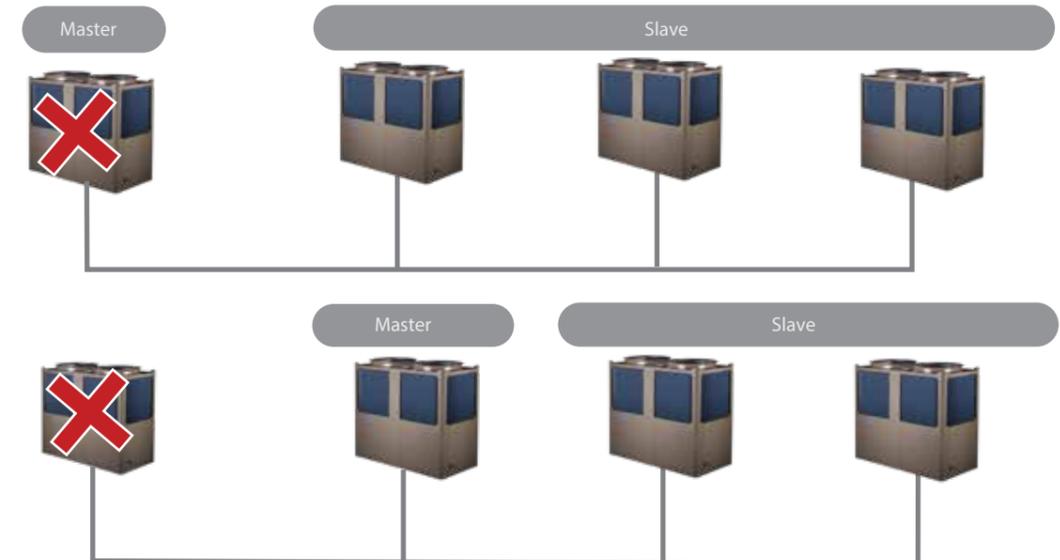

In one combination module, all slave units operate as alternative in cycle duty to keep equal running time, realize higher stability, better reliability and longer lifespan.

For example, five modules combination, no.1 is master unit, others are slave units.

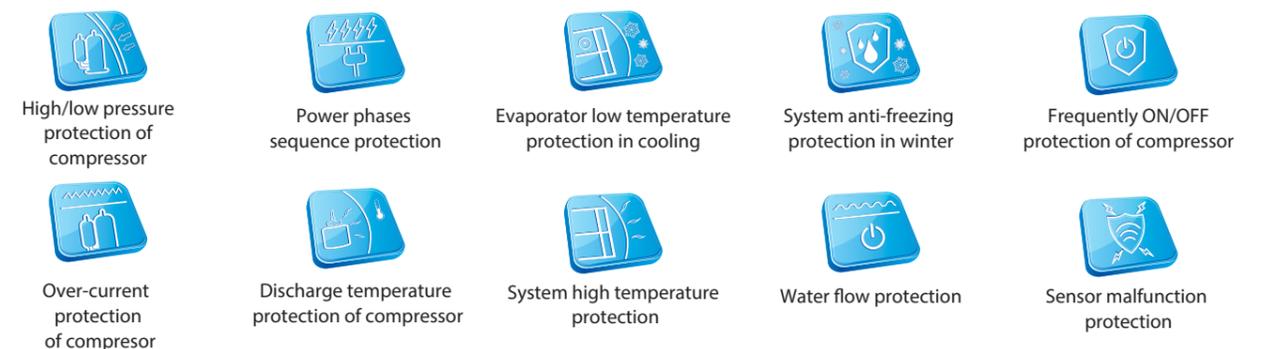

❖ Back-up functions

In a combination system, if one module failed, other modules can be back-up instead of the failed one for continuing operation.

❖ Reliable protections

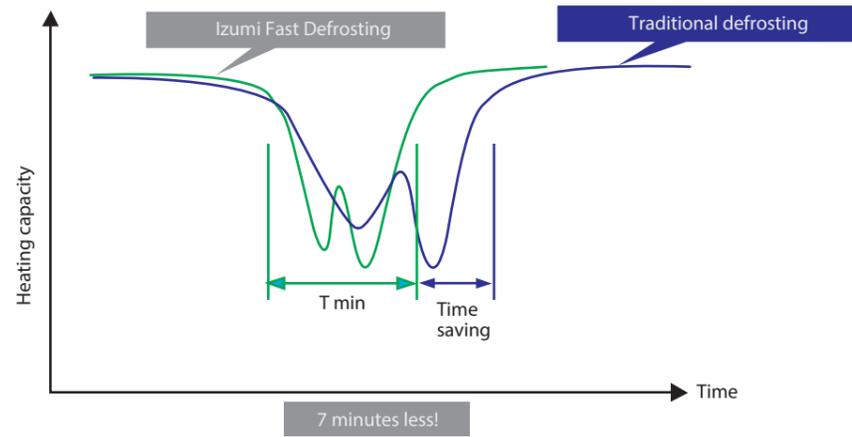

Multiple protections are adopted to ensure system stable running.

Izumi Air Cooled Chiller

❖ Intelligent defrosting technology

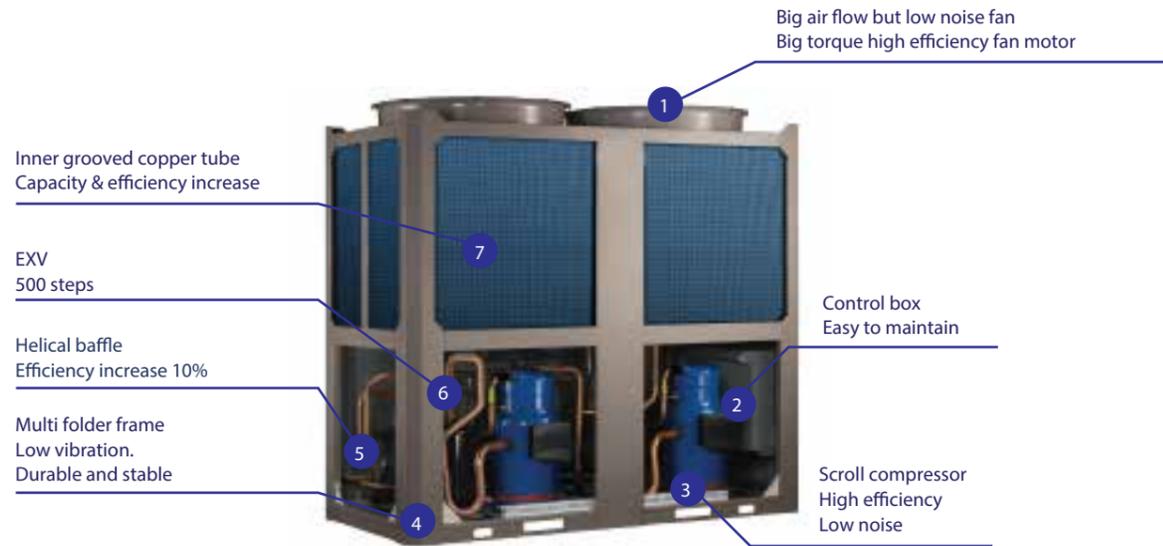

Model alternative defrosting technology ensures little fluctuation on water temperature.
Manual defrosting program is available for service purpose.

Flexible installation >>

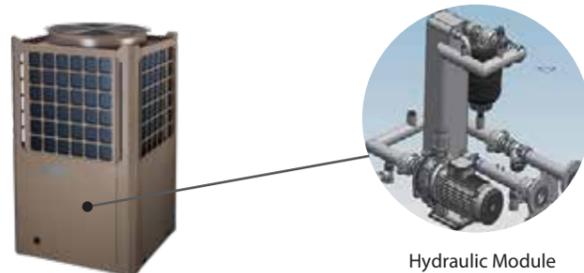

❖ Compact structure design

Super power chiller uses compact structure design, light weight, easy for transportation and installation.

❖ Built-in hydronic module

For ISP-HMLA series, built-in hydraulic module products are available. The modules are fully integrated and built-in expansion tank, plate heat exchanger, water circulating pump, etc. It saves you much installation space and cost.

Easy control >>

❖ Touch key wire controller as standard accessory to control the chillers.

❖ Remote control functions for convenient operation

There are ON/OFF, Heat/Cool and Alarm terminals ports on PCB, connect switches from these terminal ports and remote control functions can be easily realized.

Note: When use the remote control function, the wired controller will be invalid for ON/OFF and mode selection.
